## Letter Of Appreciation – Solar Panel Benchmarking – DML Tool (NCPRE IIT Bombay)

Date:-16 August 2018

To,  
Mr. Hardik Bhutka  
Malad-East,  
Mumbai-400097.

Dear Hardik,

It is a great pleasure for me to inform you that the Project which was undertaken by you for the National Centre for Photovoltaic Research and Education (NCPRE) at IIT Bombay has been completed on time with all quality protocols satisfied. I acknowledge your expertise in understanding the requirements and quickly coming up with the design. Your suggestion of making a small mock-up of the product to test functionality was very useful in rectifying many problems at an early stage. Your courteous and prompt actions led us to achieve our goals within a short duration of time between May 2018 to Aug 2018.

Your innovative suggestion about the use of Aluminium extrusion in place of Aluminium Bars helped to make the structure lightweight and cost-efficient, which is a testament to your outstanding abilities and keen research insights. The final product that we received is easy to use and produces the desired results. The use of Toggle clamps in place of nuts and bolts made solar panel mounting and unmounting very easy and quick. We appreciate your dedication to design and manufacturing, and your unwavering commitment to supply the DML Tool on time. Your positive approach to problem-solving and your passion for exploring new avenues, are qualities that truly set you apart.

We hope our paths cross once again in the future. My best wishes to you for success in your future endeavours.

Thanks and regards,

(Juser Vasi)  
Professor Emeritus  
Department of Electrical Engineering
